

Work Placement Opportunities

What is it?

Developing a placement/ attachment system within the MSC HRM full time course.

What is involved?

Firstly to work out what kind of placement/ attachment would best fit within the confines of a twelve month programme; and secondly to get this system in place at the same time as the course is re-validated in April 2007.

Why is the project important to the CETL and the University?

Firstly, very few MSc HRM courses in the country have an attachment of this kind, so it will be a good selling point for the course. Secondly, it will provide our graduates with some HR based experience which will help them to get jobs faster when they graduate.

What do you hope the project will achieve?

I hope that it will achieve its objectives as stated above and within the time frame required. I also feel that it will enrich the quality of the course.
