

# Centre for Excellence in Teaching and Learning for Employability (e3i)

HEA Seminar at Sheffield Hallam University  
12 May 2010

Volume 1: Presentation Slides

# Itinerary

**20 May 2010**

**Room 7139, Stoddart Building, Sheffield Hallam University**

**9:30-10:00:**

Tea and Coffee

**10:00-11:15:**

**Graduates' perspectives on the influence of HE on their employability**

**pp. 2-7**

**by David Laughton**

**11:15-11:30:**

Break

**11:30-12:15:**

**Developing employability skills through the use of electronic learning logs**

**pp. 8-14**

**by Jeff Waldock**

**12:15-13:00:**

**Developing autonomy and employability: The European Challenge**

**pp. 15-20**

**Berlin 2008-2010**

**by Nick Nunnington**

**13:00:**

Lunch, Hallam View

---

---

---

## Research questions/method

- "To what extent do alumni perceive that their university experience has prepared them to gain employment; how has it enhanced their employability?"
- "To what extent did their university experience prepare graduates for performing in the world of work?"
- Research method: mixed approach using quantitative and qualitative methods; survey instrument followed by a number of case study interviews (open ended questions via telephone interviews).
- Sample: recent graduates enrolled on the university's alumni site; all students who graduated in 2006 and 2007 and who were enrolled on the alumni site were consulted; 168 responses, 13 telephone interviews

Centre For Excellence in Teaching and Learning in Embedding, Enhancing and Integrating Employability <http://employability.shu.ac.uk>

---

---

---

---

---

---

---

---

## Responses by faculty

Centre For Excellence in Teaching and Learning in Embedding, Enhancing and Integrating Employability <http://employability.shu.ac.uk>

---

---

---

---

---

---

---

---

## Responses by age bands

---

---

---

---

---

---

---

---

## Where do graduates perceive skills to be learnt best?

- See table 1
- Participants felt that eleven of the nineteen skills and attributes could be learnt equally well in either environment. Only two skills were identified as being best learnt in a work environment: these were **adaptability/flexibility** and **managing others**.
- The following skills were perceived to be best learnt in an academic environment: **lifelong learning; written communication skills; numeracy; taking responsibility for your learning; presentation skills; and information gathering skills**.

---

---

---

---

---

---

---

---

## Skills/attributes which graduates would have benefited from more guidance on at university

- See table 2
- Top 5 responses: **managing others 50%**, **using new technologies 35.7%**; **presentation skills 32.7%**; **oral communication skills 27.4%**; **decision-making 25.6%**.

---

---

---

---

---

---

---

---

## Work experience

- Opportunities for work experience whilst at university: 38% responded they had not had opportunities for work experience; 38% said they had WBL experiences whilst at university; 40 responses selected "neither/nor" or don't know/not applicable.
- WE deemed beneficial: acquisition of job search skills, application and interview process, opportunity to put theory into practice, to test drive a career, the WE itself
- Some evidence of lack of satisfaction with support whilst on placement

---

---

---

---

---

---

---

---

## Career management skills

- See table 3
- CV writing: 75 respondents indicated they felt quite or fully prepared, compared with 57 who felt unprepared. A further 27 respondents answered "neither/nor."
- 67 respondents felt quite or fully prepared in terms of the skills needed for a job interview, compared with 59 who were not at all prepared or not very prepared; one-fifth of respondents (34 responses) replied "neither/nor"
- Graduates responded positively regarding the skills required for a job, with 116 respondents (69%) stating they felt quite or fully prepared.

---

---

---

---

---

---

---

---

## Which aspects of CMS would alumni have liked more assistance in?

- See table 4
- The aspect of CMS which most respondents would have liked more assistance in was "**identifying opportunities in the graduate job market**"; 100 respondents (or 60%) selected this.
- The second most frequently selected option was "**researching careers and employers**" with 95 respondents (or 57%) identifying this.
- 93 respondents selected "**understanding what employers want from interviews**" and 92 identified "**understanding different routes into employment**".

---

---

---

---

---

---

---

---

## Prepared for the workplace?

- ❑ Graduates responded positively regarding the skills required for a job, with 116 respondents (69%) stating they felt quite or fully prepared. A considerably larger proportion of alumni felt prepared in the skills required for a job than felt unprepared.

---

---

---

---

---

---

---

---

## Prepared for the workplace?

- ❑ *"...my course in particular was quite vocational in that it was targeted for, you know to go into business analysis and pretty much systems analysis, pretty much straight away, so I feel that the module and the way the coursework and the way the modules were structured they did give a realistic view of what it would be like in business . . . and all the coursework was fairly similar to the type of tasks you have in day to day business, which is always very useful."*

---

---

---

---

---

---

---

---

## Prepared for the workplace?

- ❑ *"I think there's a great deal of difference between the theoretical side of things what you learn and the actual reality in the outside world. Certainly in terms of how you apply the knowledge what you've learnt into outside opportunities, I think, yes."*

---

---

---

---

---

---

---

---

## Career development and progression

- ❑ When asked about their ability to identify opportunities for future career planning, 42% of graduates agreed they had the ability to identify opportunities for future career progression compared with 32% who did not. A further one fifth of respondents did not feel they could answer the question
- ❑ 60% of alumni surveyed either did not have a clear plan for their development and progression, or expressed uncertainty over their career development plans.

---

---

---

---

---

---

---

---

## Do graduates have an interest in their CPD?

- See table 5
- 70% of respondents indicated an active interest in their CPD
- 43% indicated they feel able to identify opportunities for future career progression
- 34% indicated they have a clear plan for career development and progression

---

---

---

---

---

---

---

---

## Discussion points

- ❑ Skills – learnt better in university or the workplace? Although responses suggest equally well in either place, the nature of skills is perceived differently in these contexts – support for more WBL within course provision? How can this be achieved?
- ❑ Relative emphasis on skills development – is more needed in relation to *managing others, using new technologies, communication skills* and *decision-making*? Can the HE curriculum accommodate more of these?

---

---

---

---

---

---

---

---

## Discussion points

- Placement, yes, but is enough being done to build learning from other work-based experiences into the curriculum and encourage students to recognise a wider range of transferable skills? What can be done?
- Career development and progression – is more focus on this plus advice and guidance required – how can this be achieved in a “scaled up” manner?

**A Manifesto for Graduate Recruitment**, AGR, 9 March 2010.  
**Universities should:**

- Embed employability skills in all degree courses
- Demonstrate the value of degree courses to students and parents

David Lammy  
Minister for Higher Education and Intellectual Property  
Graduate Employability Conference, 3 March 2010

*"More and more universities are coming to realise the sheer breadth of the skills-set that their students may need to carry into the world of work if they are to achieve their full potential"*

*"Many more [young people] will have not only have the specialist knowledge that employers value, but also the skills necessary to make best use of that knowledge, for themselves, for their employers and ultimately for all of us"*

Mathematics Subject benchmark - a 'National Curriculum' for HE  
<http://www.qaa.ac.uk/academicinfrastructure/benchmark/statements/Maths07.asp>

*"MSOR graduates will possess general study skills, particularly including the ability to **learn independently**"*

*"They will also be able to **work independently** with patience and persistence, pursuing the solution of a problem to its conclusion. They will have had the opportunity to develop general **skills of time management and organisation.**"*

*"They will also have general **communication skills**, typically including the ability to work in teams, to contribute to discussions, to **write coherently** and to **communicate results clearly.**"*

5

**Employability skills:**

- Verbal communication
- Written communication
- Analysing and problem solving
- Team working and interpersonal skills
- Reflection and self-awareness
- Personal planning, time management and organisation
- Target setting, action-planning
- Initiative, enterprise, adaptability
- Autonomy
- Numerical reasoning, Information literacy and ICT skills

Sheffield Hallam University

---

---

6

Employability skills, potentially developed through **PDP**

- Verbal communication
- **Written communication**
- Analysing and problem solving
- Team working and interpersonal skills
- **Reflection and self-awareness**
- **Personal planning, time management and organisation**
- **Target setting, action-planning**
- Initiative, enterprise, adaptability
- **Autonomy**
- Numerical reasoning, Information literacy and ICT skills

Sheffield Hallam University  
 SHARPENS YOUR THINKING

---

---

---

---

---

---

---

---

---

---

**... have the opportunity to develop general skills of time-management and organisation**

13

*"gave me constant awareness of my assignment deadlines ... each week I would write about how I had ones due .."*

*"It has helped me keep a track of the activities that I have and haven't completed during the week. This has helped me work out what things are next in priority."*

*"It has helped me to condense my thoughts about what I am doing, what I have done, and more importantly what I still needed to do. This kept me on track."*

Centre For Excellence in Teaching and Learning in Embedding, Enhancing and Integrating Employability  
<http://employability.shu.ac.uk>

---

---

---

---

---

---

---

---

**... have general communication skills ... write coherently and communicate results clearly**

14

*"From the usage of Progress File I gain lots of things like better apprehension in lessons, self-criticism and the most important helps me to improve better my English."*

*"The progress file has helped me to develop my communication skills and to become more confident in talking about my own work and feelings on the course."*

Centre For Excellence in Teaching and Learning in Embedding, Enhancing and Integrating Employability  
<http://employability.shu.ac.uk>

---

---

---

---

---

---

---

---

**... have 'the ability to work .. with a degree of independence' and 'the ability to learn independently'**

15

*"When you are entering a comment into the logbook you have to think about it carefully and if it is something that you have been struggling with then I sometimes find that by thinking about it I have solved my problem that I was going to write in the first place."*

*"This was very helpful, as it allowed me to break down problems and deal with them swiftly and effectively"*

Centre For Excellence in Teaching and Learning in Embedding, Enhancing and Integrating Employability  
<http://employability.shu.ac.uk>

---

---

---

---

---

---

---

---

### Additional perceived benefits...

16

#### Staff-student communication:

*"It is a great place for communication and helped strengthen the bond between teacher and student because it allows the lecturers to understand more about what we the students want"*

---

---

---

---

---

---

---

---

### Additional perceived benefits...

17

#### Problem – response – action:

*"I have definitely used it for reflection and taken the appropriate action from it as I have often listed problems that I have had then I have had a response and taken appropriate action from there on"*

---

---

---

---

---

---

---

---

### Additional perceived benefits...

17

#### Problem – response – action:

*"I have definitely used it for reflection and taken the appropriate action from it as I have often listed problems that I have had then I have had a response and taken appropriate action from there on"*

*"The most useful thing about it is that the tutors read what I have put and sometimes have contacted me by email and the problem that I have had has been sorted before the next tutorial, which has meant I have been able to continue with my work and get the maximum from the tutorial questions"*

---

---

---

---

---

---

---

---

### NSS - 'Personal development' section

18

	Question	2008	2009
Q19	This course has helped me present myself with confidence	91%	95%
Q20	My communication skills have improved	91%	95%
Q21	As a result of the course, I feel confident in tackling unfamiliar problems	94%	97%

Year	Score	National Ranking
2005	4.03/5	2nd (equal)
2006	4.00/5	4th (equal)
2007	96%	1st
2008	92%	1st
2009	95.7%	1st

---

---

---

---

---

---

---

---

---

---

For personal development planning to succeed...

19

- it needs to be embedded, and be **part of core academic activity**
- it needs to be carried out **regularly**
- the benefits and purpose should be **explained** to learners
- the **process** is more important than the **bureaucracy**
- **all staff need to be engaged** with the process
- collect and use **student feedback**
- the process needs a key **staff champion**
- it should gain **academic credit**

---

---

---

---

---

---

---

---

---

---

- Over two weeks the students collectively apply their knowledge by assessing the company's requirements and analysing potential premises in several cities (e.g. Vienna, Bratislava).
- Students visit premises, interview local agents, and conduct field research in these cities. This provides each group with relevant, real data.
- Each group draws up a report and makes a professional presentation to the company board, which is played by tutors.

---

---

---

---

---

---

---

---

- Employability enhancement is at the heart of the project.
- Evidence from past students that it has directly contributed to gaining employment.
- Develops many standard employability skills but also very contemporary ones – such as working in a multi-national cross cultural team.
- Puts AUTONOMY – the first feature of Sheffield Hallam's Employability Framework at the heart of its pedagogy.

---

---

---

---

---

---

---

---

**Students as  
consultants,  
tutors as clients**

---

---

---

---

---

---

---

---

## How does the Challenge drive employability?

it pushes all the current topical employability buttons:

- *internationalisation - non UK centric - challenges a UK perspective*
- *team working (cross cultural)*
- *autonomy and self reliance*
- *commercial awareness*
- *client management*
- *communication, motivation . . .*

- “hit the ground running” (“What do graduates do” 2005)
- competitive, intensive and demanding
- raises profiles – CV’s and interview
- It’s FUN – yes **FUN** - “work hard – play hard”

---

---

---

---

---

---

---

---

---

---

---

---

---

## Student Comments

### Pressure:

The pressure was constant and at times a concern – we worked all night on our brief. We worked all through the night but had the sense to send the people delivering the presentation to bed.  
It was pressured but we felt this was appropriate – it mirrors real life – work is not fed like at Uni it has deadlines and pressure points.  
We learnt so much from our mistakes in the first part in terms of time management. The pressure was an essential component of the experience – I would not have developed and changed so much without it.  
The time scales forced us to work better as a team.  
I find it hard to believe what we achieved in the time scales – I have never achieved such excellent work before even when I had much longer to complete it.  
The time scales were brutal but they made us focus and looking back it worked...I do not think the project would have achieved the same results without the time pressure.

---

---

---

---

---

---

---

---

---

---

## Student Comments

### Intensity

This project was...well manic but talking to people in the real estate business they have told me times when they were working just as intensively – it is a great preparation or practice.  
I have learnt so much in two weeks that I will NEVER forget, the intensity makes it stick, it seems real not a simulation.  
The intensity really supported the doing by learning idea...I was seeing, hearing and doing all the time – the role play increased the intensity...the tutors playing.  
  
The directors didn't let anything slip – they made us feel like idiots sometimes – but we deserved it and next Board meeting we upped our game – the intensity of the experience made me develop my skills over night – especially in managing the interaction with the client and making sure we extracted the right information from them.

---

---

---

---

---

---

---

---

---

---

## Student Comments

### Comfort Zone

The first day was really scary, whilst we had sent e-mails and used Facebook and hotmail, actually meeting the team was hard – especially at the same time we heard from the tutors just what was expected of us in two weeks.  
I hadn't travelled much before this, so here I was in Berlin with five students from all over Europe and a huge Challenge in front of us...I was very unsure during the first hour or so...but after the ice breakers and team building events I felt more confident...we were all in the same boat...and the tutors were really supportive.  
My team mates were so competitive I felt initially like I wasn't good enough and I felt really challenged but with the support of the tutors we examined why we were there and what we wanted to get out of the experience – sharing that really helped.  
I was at times way out of my comfort zone, especially at the beginning. But now I realise how much I have grown and without this experience I really would not have the same amount of confidence...it has been...and I know this sounds silly but life changing.

---

---

---

---

---

---

---

---

---

---

## Questions:

- What is the value of this kind of experience?
- How has it directly boosted employability?
- What new ideas does this make you think could be used to enhance employability in your own discipline?
- What is your own experience in using role play and simulation?
- What skills were developed in the Challenge ?
- International aspects of employability – how does this complicate things ?
- Can more digital technologies play a part in offering such experiences to large groups?

---

---

---

---

---

---

---

---
